TOPTEAM GROUP

Quality+ Innovation +Professional

We are a creative stationery company,who integrates the advantages of manufacturing and services.

TOPTEAM focuses on its manufacturing business of Stationery in Protecting & Organizing categories, Our factories are continually updating to REACH a standard of optimal quality and maximum capacity, Maintaining excellence in these 2 categories gives rise to our outstanding competitiveness in the industry.

TOPTEAM deals with OEM, ODM and Brand production, Either we offer our own stylish designs for you to choose from or we produce according to your specifications.

TOPTEAM isn't just about selling stationery, We do whatever it takes to develop long term & trusting relationships, we are strictly, professional, efficient, reliable and full responsible, we do whatever possible to share the burden of our retailers and support your success.

We welcome new partners who identify with our values, with our access to a wide range of global outlets, expertise in manufacturing and impartial quality checking, there are many areas of the stationery business we can cooperate on.

What is material recycling??

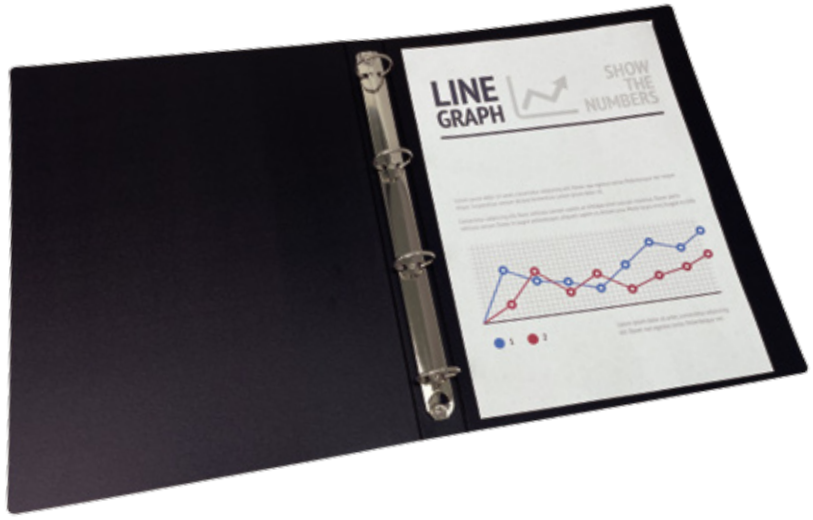

Post-consumer Polyester Products

Pulverization & Granulation

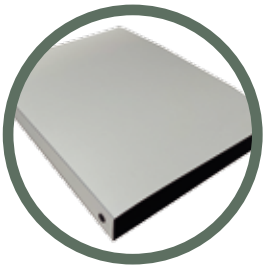

Recycled Products Cover made from 80% recycled materials

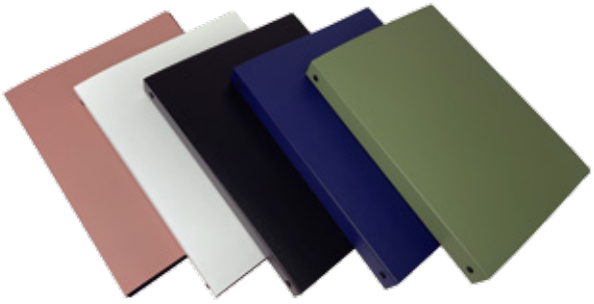

At TOPTEAM, Recycled materials have already been used before and renewed for further use.
Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby reducing: energy usage, air pollution and water pollution.

Eco File+

wheat straw

MADE FROM BLENDING
WHEAT STRAW MATERIALS

What makes a Eco File+ by Bio-Plastics?

Plant-based plastics, also known as Bio-plastics, are creative new materials that have qualities and benefits similar to traditional plastics.

Wheat straw is the byproduct that is left over after the wheat harvest. And by using it to make a plastic-like substance. It is an ideal zero-waste option.

Production of Bio-plastic consumes less energy and gives off less CO_2 emissions than the production of synthetic plastic which is derived from petroleum.
