

自动排水装置说明

Description of automatic drainage device

1、A图所示：主阀关闭时，排水阀打开，余水排出，直至排空；

As shown in Figure A: when the main valve is closed, the drain valve is opened and the residual water is discharged until it is empty.

2、B图所示：减压阀打开，排水阀开始慢慢关闭，直至全关；

As shown in Figure B: the pressure reducing valve is opened and the drain valve starts to close slowly until it is fully closed.

3、C图所示：主阀打开，排水阀完全关闭，消火栓正常供水。

As shown in Figure C: the main valve is opened, the drain valve is completely closed, and the fire hydrant supplies water normally.
